

## **TOSHIBA CONFIGFREE™ IN ACTION SUMMIT FOR NET MEETINGS**

ConfigFree™ is a unique software utility that makes it easy to manage wired and wireless connections.

Incorporating wireless productivity features, ConfigFree enables you to use wireless networking for enhanced data exchange and meeting functionality.

**PROFILE SETTINGS** – Easily capture location-based connectivity profiles for future use. Automatically switch profiles for enhanced mobile working.

**CONFIGFREE™ SUMMIT** – Establish net meetings in an instant. Documents can be shared with drag and drop functionality.

**WIRELESS RADAR** – This intuitive radar screen graphical user interface displays nearby wireless devices and enables drag & drop connectivity.

**CONNECTIVITY DOCTOR** – Analyses your network connection and assists in diagnosing and fixing the problem.

### **MOBILITY ISSUE**

#### **HOW TO MAKE MORE PRODUCTIVE USER OF MEETINGS?**

Mobile productivity goes beyond seamless connectivity. Efficient teamwork requires the ability to transfer information to many different players simultaneously. Project decision-making and team productivity depend on easy, spontaneous file sharing.

### **MOBILITY SOLUTION**

#### **CREATE A NET MEETING WITH SUMMIT**

ConfigFree Summit provides a simple way to share files with other networked computers and devices, as long as you can connect to them through a LAN (wired or wireless) or PAN (Bluetooth connection).

From the ConfigFree launcher, you can use ConfigFree Summit to invite local computers to a virtual meeting room, where files can be shared. Share files with the entire group or selected individuals.

### **KEY BENEFITS SUMMIT**

- Intuitive graphical interface to create a virtual conference room
- Chat with individuals in the meeting
- Use the Memo Board for taking minutes
- Drag and drop files you want to share with meeting participants

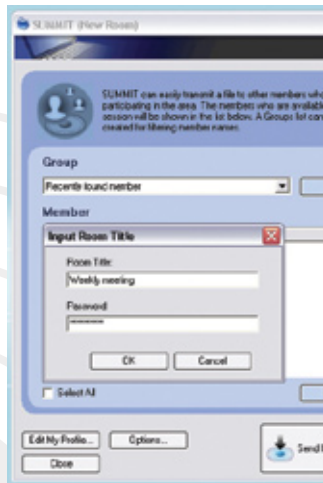

## CREATE A VIRTUAL CONFERENCE ROOM

Summit is used to create a virtual conference room with other members who are using ConfigFree on the network. Simply send an invitation to include members in the meeting.

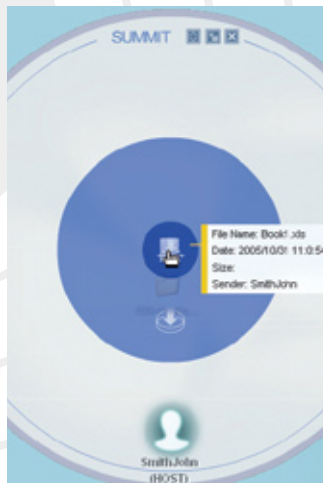

As members join the conference, you will see them in the Summit virtual conference room. Click on a user to chat with him or her. The Message Board can be used for all participants to converse online. The Memo board can be used for taking meeting minutes.

To enhance the virtual meeting effect, each participant can use the MyPC icon and Edit my Profile functions to upload a photo of himself or herself. Using the “Send my picture” function, this image can be shared with other participants in the meeting.

## 1 SECURED VIRTUAL MEETING ROOMS

Users can send an invitation to include members in the meeting. For enhanced meeting security, entry to the conference room can be password protected with ConfigFree version 5.7.

## 2 SHARING FILES IS EASY

Drag and drop a file into the middle of the pictured room to share the file with all the participants or send the file directly to a individual participant only.

Summit also supports a “Quick share” feature. Simply drag and drop a file onto the “wireless radar” icon in the ConfigFree launcher, and you can immediately choose a local computer to receive the file.

You can also right-click on a file and select “Send to Summit Devices” from its context menu to use the “quick share” feature.
